

Pickle Degreaser SLOTOCLEAN CR

Pickle Degreaser SLOTOCLEAN CR is a pickle aid and, due to its activating components, also suitable for stubborn pickling problems like the removal of scale, burned-in oil or oil carbon, whilst preventing etching of the base material.

The Pickle Degreaser SLOTOCLEAN CR is based on two liquid components and is usually applied in combination with common hydrochloric or sulphuric acid based pickles. Pickles containing SLOTOCLEAN CR also remove oil and grease residues and enables fast pickling action by the acid.

Pickle Degreaser SLOTOCLEAN CR does not contain alkylphenoethoxylate and is free of complexing agents and AOX.

The information in this data sheet is based on laboratory as well as practical experience. Figures quoted for operating limits and replenishment quantities are for guidance. Actual values necessary will depend on the components being plated (material and geometry), their application and plating plant conditions.

Important:

Please read these instructions carefully and follow recommendations given.

We reserve the right to make technical changes as necessary.

In the interests of safety, please pay attention to the R- and S- phrases on the drum label.

The shelf life of the additives is generally 18 months.

The date of production is taken from the first 3 figures of the batch number.

Figure 1 = year; figures 2-3 = month; figures 4-7 = batch number; (UK labels use a 4 digit year code).

For the storage of chemical products only the Hazardous Substances Regulation must be followed.

The Hazardous Goods Regulation (ADR/GGVS) are only valid for transportation and must not be applied to storage.
