

Degreaser

SLOTOCLEAN EL 130

The Degreaser SLOTOCLEAN EL 130 is a universal cleaning process for electrolytic degreasing respectively activation of non-ferrous metals, zinc die-cast and steel. It can be operated both - anodically and cathodically. The Degreaser Salt EL 131 does not contain any cyanide, surfactants and complexing agents. It contains silicate, small amount of phosphate and sodium hydroxide.

Schlötter offers a wide range of additives to enhance cleaning. Please refer to operating data sheet no. 02300 for an additive summary and their different possible combinations.

The information in this data sheet is based on laboratory as well as practical experience. Figures quoted for operating limits and replenishment quantities are for guidance. Actual values necessary will depend on the components being plated (material and geometry), their application and plating plant conditions.

Important:

Please read these instructions carefully and follow recommendations given.

We reserve the right to make technical changes as necessary.

In the interests of safety, please pay attention to the R- and S- phrases on the drum label.

The shelf life of the additives is generally 18 months.

The date of production is taken from the first 3 figures of the batch number.

Figure 1 = year; figures 2-3 = month; figures 4-7 = batch number; (UK labels use a 4 digit year code).

For the storage of chemical products only the Hazardous Substances Regulation must be followed.

The Hazardous Goods Regulation (ADR/GGVS) are only valid for transportation and must not be applied to storage.
