

Bright Zinc Bath SLOTOCYN 10

The cyanide Bright Zinc Bath SLOTOCYN 10 is easy to handle and features high stability and high applicable cathode current densities. Its coatings are bright over a wide current density range and show a good chromating behaviour, even if the bath temperature is slightly raised. Bright Zinc Bath SLOTOCYN 10 can be operated in barrel and rack installations with either high or low cyanide levels, depending on the zinc concentration in the bath.

Important:

Please read these instructions carefully and follow recommendations given.

We reserve the right to make technical changes as necessary.

In the interests of safety, please pay attention to the R- and S- phrases on the drum label.

The shelf life of the additives is generally 18 months.

The date of production is taken from the first 3 figures of the batch number.

Figure 1 = year; figures 2-3 = month; figures 4-7 = batch number; (UK labels use a 4 digit year code).

For the storage of chemical products only the Hazardous Substances Regulation must be followed.

The Hazardous Goods Regulation (ADR/GGVS) are only valid for transportation and must not be applied to storage.
