

Black Passivation

SLOTOPAS ZE 160

IMDS ID No. 900896

SLOTOPAS ZE 160 is a black passivating process for post-treatment of zinc-iron coatings with 0.7 - 0.8 % iron in the alloy.

SLOTOPAS ZE 160 followed by a transparent sealant from our SLOTOFIN series gives uniform black surfaces and improves the corrosion resistance as well.

The Black Passivation SLOTOPAS ZE 160 is free of chrome(VI).

The information in this data sheet is based on laboratory as well as practical experience. Figures quoted for operating limits and replenishment quantities are for guidance. Actual values necessary will depend on the components being plated (material and geometry), their application and plating plant conditions.

Important:

Please read these instructions carefully and follow recommendations given.

We reserve the right to make technical changes as necessary.

In the interests of safety, please pay attention to the R- and S- phrases on the drum label.

The shelf life of the additives is generally 18 months.

The date of production is taken from the first 3 figures of the batch number.

Figure 1 = year; figures 2-3 = month; figures 4-7 = batch number; (UK labels use a 4 digit year code).

For the storage of chemical products only the Hazardous Substances Regulation must be followed.

The Hazardous Goods Regulation (ADR/GGVS) are only valid for transportation and must not be applied to storage.
